

Linx

Brassware

Linx Range

Before you Start

These instructions contain all the necessary installation information for your MX Brassware.

Please read these instructions carefully and check all the components for any sign of damage before starting your installation.

The installation must be carried out by a suitably competent person.

Conveniently situated service valves to each inlet supply must be fitted as an independent method of isolating the tap(s) for maintenance or servicing.

Please note that you may require both 1/2" and 3/4" tap connectors (NOT SUPPLIED)

To comply with water regulations isolating valve should be fitted to the pipe work.

This enables each supply to be independently isolated for servicing.

Operating Pressures (Bar)

	Min	Max
Basin Taps	0.2	5.0
Bath Taps	0.2	5.0
Mono Mixer	0.2	5.0
Bath Filler	0.2	5.0
*Bath Shower Mixer	0.2	5.0

*Balanced inlet supply pressures are recommended for optimum performance of the shower mixer.

Maximum static water pressure 10 bar.

Maximum hot water temperature of 65°C as this meets all normal requirements.

Parts Supplied - 1/2" Linx Mono Basin Tap

A Tap x 1

B Plinth with seal x 1

C C Shaped Rubber Washer x 1

D C Shaped Metal Washer x 1

E Threaded Stud x 1

F Flexible Pipes x 2

Installation – 1/2" Linx Mono Basin Tap

- 1** Before proceeding with the installation check all the components are present and not damaged (see page parts supplied).
- 2** Screw the threaded stud **E** into the tap body **A** (short threaded end).
- 3** Install tap **A** to basin ensuring the plinth with seal **B** is fitted correctly.
- 4** Assemble C shaped rubber washer **C** and the C shaped metal washer **D** to the threaded stud **E** and secure using the nut and tighten using suitable spanner.
- 5** Screw the two flexible pipes **F** into the tap **A** (Note do not over tighten). Connect both hot and cold supplies to flexible pipes.
- 6** Turn on water supplies and check for leaks.
- 7** Lift handle to turn on, hot to the left, cold to the right.

Note! Other tools and materials may be needed depending on the specific site requirements.

Parts Supplied - Click Clack Waste

A Waste x 1

B Washer x 2

C Backnut x 1

Installation – Click Clack Waste

- 1** Remove backnut **C** and one washer **B** from waste thread.
- 2** Install waste **A** to basin.
- 3** Using washer **B** and backnut **C** assemble the waste **A** to the basin by tightening the backnuts **C**. A suitable spanner maybe required.
- 4** To open and close the waste **A** push down on the centre of the waste **A**.
- 5** Check for leaks with the waste closed and open.

Note: Silicone may be require to improve the seal.

Note! Other tools and materials may be needed depending on the specific site requirements.

Parts Supplied - 1/2" Linx Basin Taps

A Tap x 2

B Washer x 4

C Backnut x 2

Installation – 1/2” Linx Basin Taps

- 1** Before proceeding with the installation check all the components are present and not damaged (**see page parts supplied**).
 - 2** Remove backnut **C** and one washer **B** from tap thread.
 - 3** Install tap **A** to basin.
 - 4** Using washer **B** and backnut **C** assemble the taps to basin by tightening the backnuts **C**. A tap spanner maybe required.
 - 5** Connect both hot and cold supplies to taps **A**.
- Note: Tap connectors not supplied.**
- 6** Turn on water supplies and check for leaks.

Note! Other tools and materials may be needed depending on the specific site requirements.

Parts Supplied - 1/2" Linx Bath Taps

A Tap x 2

B Washer x 4

C Backnut x 2

Installation – 1/2" Linx Bath Taps

- 1** Before proceeding with the installation check all the components are present and not damaged (**see page parts supplied**).
 - 2** Remove backnut **C** and one washer **B** from tap thread.
 - 3** Install tap **A** to bath.
 - 4** Using washer **B** and backnut **C** assemble the taps to bath by tightening the backnuts **C**. A tap spanner maybe required.
 - 5** Connect both hot and cold supplies to taps **A**.
- Note: Tap connectors not supplied.**
- 6** Turn on water supplies and check for leaks.

Note! Other tools and materials may be needed depending on the specific site requirements.

Parts Supplied - 3/4" Bath Mixer

A Bath Filler x 1

B Washer x 4

C Backnut x 2

Installation – 3/4" Linx Bath Mixer

- 1** Before proceeding with the installation check all the components are present and not damaged (**see page parts supplied**).
- 2** Remove both backnuts **C** and one washer **B** from each of the inlet threads.
- 3** Install bath filler **A** to bath.
- 4** Using washers **B** and backnuts **C** assemble the bath filler to the bath by tightening the backnuts. A tap spanner maybe required.
- 5** Connect both hot and cold supplies to inlet thread.
Note: This connections require 3/4" tap connectors not supplied.
- 6** Turn on water supplies and check for leaks.

Note! Other tools and materials may be needed depending on the specific site requirements.

Parts Supplied - 3/4" Linx Bath Mixer

A Handset x 1

B Wall Bracket x 1

C Shower Hose x 1

D Bath Mixer x 1

E Washer x 4

F Backnut x 2

Installation – 3/4" Linx Bath Mixer with Shower Kit

- 1** Before proceeding with the installation check all the components are present and not damaged (see page parts supplied).
- 2** Remove both backnuts **F** and one washer **E** from each of the inlet threads.
- 3** Install bath mixer **D** shower to bath.
- 4** Using washers **E** and backnuts **F** assemble the bath mixer shower **D** to the bath by tightening the backnuts **F**. A tap spanner maybe required.
- 5** Connect both hot and cold supplies to inlet thread.
